

ANIMAL WELLNESS & PERFORMANCE

Where veterinary rehab science meets agility conditioning.

MEET THE PRACTITIONER

DR MONTANA REDFERN

Registered veterinarian, sports medicine & rehabilitation specialist — and an agility competitor herself. Montana works dog-side every week, on the start line and in the rehab gym.

That combination — clinical veterinary training with hands-on conditioning coaching — means assessments translate directly into training your dog can actually do.

CREDENTIALS

- BVSc**
Bachelor of Veterinary Science
- CCRP**
Certified Canine Rehabilitation Practitioner, University of Tennessee
- MANZCVS**
Sports Medicine & Rehabilitation (Canine)

WHAT WE OFFER

- ✓ Sports Dog Biomechanical Assessment
- ✓ Conditioning Sessions
- ✓ Seminars & Workshops
- ✓ Sports Dog Biomechanical Review
- ✓ Return to Sport Plans

OUR PHILOSOPHY

TARGETED, PROGRESSIVE CONDITIONING — NOT MORE VOLUME.

Overtraining doesn't build athletes; purposeful exercise does. We prescribe deliberate, progressive loading that builds stronger, more injury-resistant dogs — so every session earns its place in your dog's week.
