Friday

25th. September 2026

Judge: Ms. Tijana Konrad
(Serbia)

Get to know your judge...

Ms. Tijana Konrad (Serbia)

Tijana Konrad is an energetic, enthusiastic and talented young woman in the dog world. Tijana is a third generation "Dog Person". She remembers all her life growing up with dogs around her and they remain her biggest love.

Tijana began to handle in the ring at 9 years of age, with a Basset Hound as her first show dog. Her parents bred German Wirehaired Pointers and Chihuahuas. Tijana is a long-time breeder of Labrador Retrievers and Chihuahuas and now focuses upon Standard Poodles. She has bred many Champions, together with World Winners under her own prefix, and in partnership with the "Jasenak" Poodle kennel.

Tijana is the daughter of the long-time President of the Serbian Kennel Club, Dusan Nesic. She is the President of the Kennel Club Kostolac, a board member of the Serbian Kennel Club and a founding member of the first Retriever Club in Serbia which runs a top Retriever Specialty Show. She is also involved with the Serbia (Belgrade) Kennel Club.

Tijana began her judging journey in 2003 and was recently elevated to All Rounder – something she is very proud of as she is a second generation All Rounder. She has judged widely in National, International and Specialty events. Her judging has taken her to many European, Scandinavian and Baltic countries, together with South Africa, Russia and several countries in Asia. Tijana judged at the 2023 World Show in Geneva – testament to the respect she has earned as a young All Rounder.

Tijana lives with her husband and daughter in Kostolac, a town on the Danube River. She has owned a pet shop business for many years. Melbourne Royal is delighted to welcome Tijana to the 2026 Judging Panel, which will be her first visit to Australia.

Breed Standard

General Appearance:	A cobby well balanced, square little dog, giving appearance of measuring the same from withers to tail root as from withers to ground.
Characteristics:	Smart little dog with disposition of a terrier. Two varieties rough coated, Griffon Bruxellois and smooth coated, Petit Brabancon. Both with pert, monkey-like expression, heavy for size.
Temperament:	Lively and alert.
Head And Skull:	Head fairly large in comparison to body, rounded but in no way domed, moderately wide between the ears. Hair on skull in roughs rather coarse. Nose always black, with large, open nostrils and definite stop between muzzle and skull. Relatively short, wide muzzle, neat lips, with good turn-up. Chin prominent, in roughs furnished with a beard.
Eyes:	Black rimmed, very dark, round, clear, alert and not too large.
Ears:	Semi-erect, high set, the smaller the better.
Mouth:	Slightly undershot with even teeth, not showing teeth or tongue.
Neck:	Medium length, slightly arched, springing from well laid back shoulders.
Forequarters:	Chest rather wide and deep, legs straight of medium length and bone.
Body:	Short back, level from withers to tail root, neither roaching nor dipping; deep; well-sprung ribs; short, strong loin.
Hindquarters:	Well muscled thighs of good length, hocks low to ground, turning neither in nor out, stifles well bent.
Feet:	Small, thick, cat-like with black toenails.
Tail:	Docked: Docked short, high set, emerging at right angles from the level topline. Undocked: High set, emerging at right angles from the level topline. Of moderate length, curved gently over back when moving.
Gait/Movement:	Free with good drive from rear. Moving true coming and going. High stepping front movement undesirable.
Coat	Roughs, harsh, wiry, free from curl, preferably with undercoat. Smooths, short and tight.
Colour:	Clear red, black or black and rich tan without white markings. In clear red, a darker shade on mask and ears desirable. Ideally each hair should be an even red from tip to root. Frosting on muzzles of mature smooths should not be penalised.
Sizes:	Weight: from 3.2-5 kgs (7-11 lbs) most desirable 3.6-4.5kgs (8-10lbs)
Faults:	Any departure from the foregoing points should be considered a fault and the seriousness with which the fault should be regarded should be in exact proportion to its degree and its effect upon the health and welfare of the dog.
Notes:	Male animals should have two apparently normal testicles fully descended into the scrotum.
