Julie and Craig Wills	

The Hungarian Vizsla Club of Victoria Inc (No AOO26740W) is affiliated with the VCA. This fixture is held under the Rules and Regulations of the VCA and a copy may be perused at the office of the Show Secretary.

Welcome to everyone to this milestone event - our Thirtieth Championship Show! We hope you enjoy the show.

A warm welcome also to our breed specialist judge, Walter Sommerfelt (USA). We hope you enjoy judging our Vizslas, and we are very interested to hear your thoughts on the breed.

Thankyou to our show personnel for fulfilling these very important roles that enable our show to run smoothly.

Many thanks to the members who have made generous donations for this event, and of course to the committee for their untiring efforts to enable us to showcase our beloved Vizslas.

The HVCV ran its first Championship Show in 1992 and has been holding at least one Championship Show each year since, except for the 2 COVID years when Victoria was in lockdown. By participating today, you are a part of our breed’s history – perhaps the results might appear in our 50th annual show’s catalogue in 2043! Perhaps we might also see some of you there.

Best of luck to all exhibitors and thank you for supporting our show.

Craig Wills

Show Secretary

ANKC BREED STANDARD – HUNGARIAN VIZSLA

FCI Standard No 57 dated June 1996, Adopted in Australia from 1st January 1998, Revised May 2001

Country of Origin: Hungary

Translated by Mrs H Gross-Richardson, Mrs Ann Mitchell and Mrs Elke Pepper

FCI Classification: Group 7 Pointing Dogs. Section 1 Continental Pointing Dogs. With working trial (Field and Water Trial)

Group: Group 3 (Gundogs)

History: The ancestors of the Hungarian Vizsla came into the Carpathian Basin with the nomadic Hungarian tribes. Written descriptions and graphic illustrations are found in documents of the 14th century. From the 18th century, his importance as a hunting dog has been increasing steadily. As early as the end of the 19th century, competitions for pointing dogs were organised in Hungary, in which Hungarian Vizslas participated with great success. In those days, other Gundog breeds most likely played an important part in the development of the breed. The specific modern breeding started in 1920, as a result of which, the Hungarian Vizsla received recognition by the FCI in 1936.

General Appearance: He is a medium sized, elegant gun dog of noble appearance with a short russet gold coat. His rather light, dry, lean structure embodies the harmony of beauty and strength.

IMPORTANT PROPORTIONS

- The body length slightly exceeds the height at withers.
- The depth of the brisket is slightly less than half the height at the withers
- The muzzle is slightly shorter than half the length of head.

Characteristics: The Hungarian Vizsla is a versatile gun dog that must be able to work in field, forest and water and have the following typical qualities. He must have an excellent nose, firmness on the point, be excellent at retrieving and have the determination to remain on the scent even when swimming, which he manifestly enjoys. He copes with difficult terrain as well as extreme weather conditions. As he is intended to be an efficient hunting dog then gun and game shyness, unwillingness to point and retrieve, as well as a dislike of water are undesirable. Because of his easy going nature and his adaptability, he can easily be kept as a companion dog in the house.

Temperament: Lively, friendly, evenly tempered and easily trained. His outstanding willingness to keep contact with his master while working is one of his essential qualities. He cannot bear rough treatment and must be neither aggressive or shy.

Head and Skull: The head should be dry, noble and well proportioned. The skull moderately wide and slightly domed. A slightly pronounced groove runs from the moderately developed occiput towards the stop. The superciliary ridges are moderately developed. The stop is moderate. His nose should be well developed and broad with nostrils as wide as possible. The colour of the nose harmonises in a dark shading with the coat colour. The muzzle is blunt, not pointed, with strong jaws that are strongly muscled. The bridge of the nose is straight. The lips are tight fitting with no pendulous flews. The jaws are powerful and the cheeks are strong and well muscled.

Eyes: The eyes are slightly oval and of medium size with well fitting eyelids. He has an intelligent and lively expression. The brown eyes harmonise with the coat colour, as dark as possible preferred.

Ears: The ears are set on at medium height, a little backwards. He has fine leathers, which hang closely to the cheeks and end in a rounded V shape. The length is about three-quarters of the length of the head.

Mouth: He has a regular and complete scissor bite with the upper teeth closely overlapping the lower teeth and set square to the jaws with 42 healthy teeth according to dentition formula.

Neck: Of medium length, harmonising with the overall appearance. The nape very muscular and slightly arched. Tightly fitting skin (no dewlap) at the throat.

Forequarters: Viewed from the front they should be straight and parallel. Viewed from the side the legs are vertical and placed well under the body. Good bones and strongly muscled. The shoulders are long, sloping and flat with well attached shoulder blades. Flexible with strong dry muscles. Well angulated between the shoulder blade and upper arm. The upper arm is as long as possible and well muscled. The elbows fit close to the body, not tied in and turning neither in nor out and are well angulated between the upper arm and forearm. The forearm is long, straight and sufficiently muscled with strong but not coarse bone. The pastern joint is short and tight. The pastern is short and only very slightly sloping.

Body: The withers are pronounced and muscular. The back is solid, strong, well muscled, taut and straight. The muscles should hide the vertebral spines. The loin is short, broad, tight, muscular, straight or slightly arched. The portion from back to loin is well coupled. The croup is broad and of sufficient length, not to cut off short. It slopes slightly to the tail and is well muscled. The chest is deep and broad with a well developed, well muscled, moderately arched forechest. The sternum should extend as far back as possible. The sternum and the elbow should be at the same

level. The ribs are moderately arched with the last ribs carried well back. The underline is elegant, tight, arching towards the rear and slightly tucked up.

Hindquarters: Viewed from behind they should be straight and parallel. Well angulated and with strong bone. The upper thigh is long and muscular with good angulation between the pelvis and upper thigh. The stifle is well angulated. The lower thigh is long, well muscled and sinewy. Its length is almost equal to that of the upper thigh. Good angulation between the lower thigh and the metatarsus. The hock joint is strong, dry and sinewy and rather well let down. The metatarsus is vertical, short and dry.

Feet: The forefeet are slightly oval, with well knit, sufficiently arched, strong toes. The nails are strong and brown in colour. He has tough, resistant, slate grey pads. The feet are parallel when standing or moving. The hind feet are similar to the forefeet.

Tail: Set on slightly low, strong at the base, then tapering. In countries where tail docking is not prohibited by law, the tail may be shortened by one quarter to avoid hunting hazards. If tail docking is prohibited, the tail reaches down to the hock joint and carried straight or slightly sabre like. On the move, it is raised up to the horizontal. It is well covered by dense coat.

Gait/Movement: The typical gait is an animated, light-footed trot, elegant and far-reaching, with much drive and corresponding reach. Not exhausting gallop when working in the field. The back is firm and the topline remains level. Good, upright carriage. Pacing undesirable.

Coat: Short and dense, should be coarse and hard at the touch. On the head and the ear leathers, it should be thinner, silkier and shorter. The hair underneath the tail should be slightly, but not noticeably longer. The coat should cover all of the body with the underside of the belly being a little lighter coated. No undercoat.

Colour: Various shades of russet gold and dark sandy gold. The ear leathers may be a little darker, otherwise uniform in colour. Red, brownish or lightened colour is undesirable. A little white patch on the chest or at the throat, not more than 5 cm in diameter, as well as white markings on the toes are not considered faulty. The colour of the lips and the eye rims corresponds to the colour of the nose. The skin is tightly fitting, without folds and well pigmented.

Sizes: Height at withers Dogs: 58-64 cms Bitches: 54-60 cms

It is ineffective to increase the height at the withers. A medium size should be aimed at. Overall balance and symmetry are much more important than the mere measurable size.

Faults: Any departure from the foregoing points should be considered a fault and the seriousness with which the fault should be regarded should be in exact proportion to its degree and its effect upon the health and welfare of the dog, and on the dog's ability to perform its traditional work.

DISQUALIFYING FAULTS

- Distinct deviations from the characteristics of the breed
- Strong deviation from the sexual characteristics
- Atypical head
- Spotted (butterfly) nose
- Pendulous or dribbling flews
- Under or overshot mouth. Wry mouth, including all intermediate forms
- One or more missing incisors and/or canine and/or premolars 2-4 and/or molars 1-2. More than two missing PM1. The M3 are disregarded. Not visible teeth are assessed as missing ones. Supernumerary teeth not in line with the others.
- Cleft palate, harelip
- Light yellow eyes. Very loose eyelids. Ectropion. Entropion. Distichiasis (double row of eyelashes)
- Pronounced dewlap
- Dewclaws
- Very faulty movement
- Atypical coat
- Dark brown or pale yellow colour. Parti-coloured. Not uniformly coloured. White chest patch larger than 5 cm.
- White feet
- Lacking pigmentation either on the skin or on the lips and eye rims.
- Any type of weakness in temperament
- Deviation of more than 2 cm from the above mentioned heights at withers

Notes: Male animals must have two apparently normal testicles fully descended into the scrotum.

OUR HISTORY – SPECIALTY SHOWS

Our first specialty show was an Open Show, held in October 1990 during our first year of affiliation with the state kennel control (now Dogs Victoria). 1990 was a busy year for our young club with our first Field Trial also held in May.

1992 was the first of our Champion level specialty shows, which have been held annually since. Our first Restricted to Breed Obedience Trial was conducted in conjunction with the championship Show in March 1994.

The weekend of the HVCV’s 6th Championship Show, held on 16 March 1997, saw the largest entry of Vizslas ever in Australia and has not been matched again. On Saturday 15/3/97, Jackie Perkins of the Gardenway prefix in the UK judged the breed at the Yarra Glen Kennel Club Championship Show. The on Sunday, Jackie judged Special Classes at the HVCV Championship Show before Gay Gottlieb of the Russetmantle prefix, also from the UK, judged breed classes. There were 104 entries at the 6th Championship Show, with 8 absent and 1 withdrawn. Ch Hanafor Master Callaway was her Best in Show winner.

ABOUT OUR JUDGE: MR WALTER J SOMMERFELT

I have been involved in the sport of purebred dogs since acquiring my first Old English Sheepdog in 1972. Over the past 50 years, I have been an exhibitor, breeder, Professional Handler, and Judge.

My wife Carol (also an AKC-approved judge) and I have owned and exhibited various breeds in all seven groups. We have been involved in the Vizsla breed since 1976 and are proud AKC breeders of merit and owners of over 100 Champions, Grand Champions, Specialty Winners, Best in Show winners, Dual Champions, and numerous performance-titled dogs. We are still very active in the breed and continue to breed and show our wonderful Vizslas'.

I have been an AKC-approved judge since 1985 and currently judge the Sporting, Working, and Herding groups, Junior Showmanship, and Best in Show.

I have had the privilege to judge many of the most prestigious shows in the United States including the herding group at the 2014 Westminster Dog Show in New York and have judged there on three separate occasions.

Along with Many National and Regional Specialties, I have also had the wonderful opportunity to Judge in many foreign countries on four different continents.

I am the current President of the Tennessee Valley Kennel Club and the Volunteer Vizsla Club of Tennessee. I am also a recipient of the AKC Outstanding Sportsmanship Award and a monthly columnist and contributing editor for Showsight magazine.

PARADE OF VETERANS

SUPREME CH GRAEBROOK SHUSHIENAE TD ET

Owned by: Julie & Craig Wills

s: Tri Ch (T&O) Hanafor Seint Edgar

d: Ch Graebrook Breaking Point

Bred by: Graebrook Kennels

Reg: 3100235686

w: 19/03/2010

Belle was the ugly duckling of the litter, and started her life as a hunting bitch. No one would have guessed that by 2013 she would be a Grand Champion. By 2015 she became a Supreme Champion, and was the first Supreme Champion to also hold a performance title. She was recognised by judges world-wide. 6 Best in Specialty Shows – her last as a veteran in 2017 in the same year that she was awarded Best of Breed at both Sydney and Melbourne Royal Shows - shortlisted to the final 8 in Group at Melbourne. She is the equal Roszda Catharina Pointscore (Vizsla) record holder along with her son Kaos for the most “Best Show Dog/Bitch in Australia” pointscore wins. She also received the HVCV “Best Show Bitch over 5 consecutive years. Dam of titled progeny in conformation and performance with Multi Best in Specialty Show, Best in Show, and Multi Best in Group awards. Her first gen progeny have earned 17 titles to date in conformation and performance disciplines. Besides all of this she is the most sweet, funny, cheeky and loving Vizsla. She’ll even dance a jig to tell you what she wants. Protector against wearers of high visibility clothing. Always on the lookout for the local birds or bunnies. We are blessed to have her in our lives.

Julie and Craig Wills

SUPREME CH DUAL CH (T) GRAEBROOK KAUSIN KAOS ET

Owned by: Graebrook Kennels

s: Ch Shaunuff Dominic (AI)

d: Sup Ch Graebrook Shushienae TD ET

Bred by: Graebrook Kennels

Reg: 3100284774

w: 13/01/2013

Kaos, aka Corky, Goober, Wiggle Bum started his show campaign with a win in baby sweepstakes, and finished it at the age of 6 ½ with a Best In Group 3rd at Melbourne Royal before COVID lockdowns started. In between he enjoyed much success handled by both Julie and Cinnamon. During his career he amassed sufficient points to be eligible for his Grand Champion title more than twice over, and became a Supreme Champion at 3 years 8 months. During his journey he was awarded multiple Best Exhibit in Group and Best in Specialty Show awards often under International judges, including Best in Specialty Show at the HVCNSW 25th Anniversary Specialty Show, which recorded the second largest Vizsla specialty entry in Australia. He is the equal record holder along with his dam for the most consecutive Roszda Catharina Pointscore (Vizsla) wins for best Show Dog in Australia. He also won the equivalent HVCV Pointscore 6 consecutive times. As he became semi retired from the show ring, he focused on Tracking. This year, Kaos completed his Tracking Champion title, making him the first Supreme Ch Dual Ch Vizsla in Australia. Kaos has numerous multiple titled progeny in conformation and performance disciplines. Above all he is a super companion, and loves it when you ask him about his nose! We are blessed to have both him and Belle in our lives.
